# 3.9 VOLT **HIGH** TEMPERATURE SULFURYL CHLORIDE CELLS

**NEW**

Engineered Power is pleased to introduce our complete line of high-temperature 3.9V Sulfuryl Li-SO<sub>2</sub>Cl<sub>2</sub> cells.

Both the LXRC-165HT-SC and LXGCC-165HT-SC high-temperature sulfuryl cells were designed to meet the requirements of the pressure gauge market. Our new line of cells have been rigorously tested and have been confirmed to meet or exceed all performance specifications of alternative supplier's cells.

Ask about sample cells, now available. To ensure we meet your equipment power profile, we provide cell testing at our manufacturing facility in Calgary, AB Canada.
